Smart**iLevel**

Product and Site Monitoring System
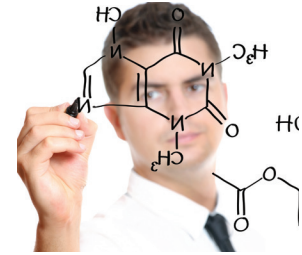

Description

A system that monitors product levels, and critical elements pertaining to product dispensing and cleaning. Tied to our mobile app, the system gives the user a clear view on real time data, history, and alert settings.

Features

- User Friendly/ Multiple Users
- Newest technology / Quality assurance
- Alert Notifications / Real time data
- Cellular capability
- Secure

Benefits

- Saves time, space and labor
- Reduced site visits, no more inventory backstock, saves money
- Improves ''Up time'' / Decreases ''Down Time''
- Cloud based data storage available 24/7
- Consistent and Accurate

Applications

Smart iLevel utilizes the information from our patented technology level indication system, and other sources that are being monitored.

Types of Operations

- Vehicle Washing
- Sanitation
- Commercial

Type of Equipment

- Fluid Dispensing
- Pressure systems
- Tank Levels
