Setup Flexibility

Flexible platform to create multiple users within a network of site(s) that are being monitored. Each user has the ability of choosing which site and which type of alerts are sent and at certain times.

PORTAL AND HOSTING SERVICE

Description

A powerful data hosting service that supports any user with real-time data, alert features, database management, and analytics from SmartiSite that powers SmartiLevel, and SmartiMeter to better manage chemical monitoring and delivery.

Features
- User friendly customizable dashboard
- Newest technology
- Alert Notification
- Real time data and reporting
- Built in security
- Cellular Capability

Benefits
- Flexibility for your business model
- Improves spreed
- Improves "Up time" / Decreases "Down Time"
- Cloud based data storage / Unlimited Storage
- Configurable access/ Latest hacking prevention
- Information at any time / Expert support 24/7

Applications

All Smart site monitoring and dispensing systems

Types of Operations
- Vehicle Washing
- Sanitation
- Industrial
- Agriculture

Type of Equipment
- Smart iSite
- Smart iLevel
- Smart iMeter
- Smart 360

SmartHosting includes (per location):

Hardware
- Dedicated Cloud Based Server
- Unlimited Server Storage
- High Performance Processors
- Advanced Cache
- Backup Storage

Software
- Auto Healing
- Auto Backups
- Dedicated Firewalls
- Cyber Attack Protection
- Cloud Computing

Service
- Technical Support
- Server Management
- 24/7/365 Real Time Server Monitoring
- Kernal Updates
- Unlimited Server Updates
